

# **CORRECTIONAL FACILITIES**

ZLEDLighting provides LED lighting for correctional facilities that can save substantial money on energy costs and provide solutions to difficult maintenance and security issues, while also improving inmate behaviors and attitudes. ZLEDLighting's products are available in an array of sizes and shapes to fit any correctional facility lighting need.

Our energy-efficient LED lights can reduce energy usage by up to 85% as compared to standard prison light fixtures using fluorescent, incandescent or CFL bulbs. This can lead to dramatic savings in facilities where lighting is required 24 hours a day/seven days a week. Additionally, with a 50,000 hour lifespan, the need for problematic prison lighting maintenance in correctional facilities is drastically reduced!

# **MAGNILUMEN PLUS<sup>TM</sup>**

Retrofitting the existing fluorescent fixtures in cells has never been easier with our magnetic, quick connecting LED Magnetic Retrofit System. Magnilumen Plus is the **GAME CHANGER** in LED retrofitting (shown installed in the ceiling above).

"I am extremely pleased with the Magnilumen Plus LED lighting strips. Between the easy plugin connections and magnetic optional installations, it allows for several retrofit applications. We've used them to replace tubes, channels, under cabinet, and surface mounted fixtures. Lightweight, reasonably priced and quick to install, I highly recommend this product."

# TESTIMONIALS

**Captain Mark Trull, Brunswick County,  
NC Sheriff's Office**

**Brunswick County  
Sheriff's Office**

"Thanks for sharing the ZLEDLighting retrofit kit with us. We recently replaced our detention center with these kits and it is absolutely amazing how easy the installation was, not to mention how much brighter these lights are compared to the fluorescent lights that we replaced.

I am anxiously waiting to see just how much these are going to reduce our energy consumption. It is important to us to have the ability to save taxpayer dollars through a reduction in maintenance cost and energy consumption. Thanks again for sharing these with us.

Due to rapid advancements in LED technology, these specifications are subject to change without notice. Please visit us online at [www.zled-lighting.com](http://www.zled-lighting.com) for our full product line and ordering details. Non-stock special order items are non-returnable and could take up to 60 days for delivery.
