SENSOR MODE

When battery capacity is above 30%, fixture automatically turns on to full brightness when motion is detected within 20 feet, then dims to low brightness with 20 seconds of no motion.

When battery capacity is below 30%, fixture automatically turns on to full brightness when motion is detected in the range of 20 feet, then turns off in 20 seconds of no motion.

CONSTANT LIGHTING MODE

Press the on/off button for 3 seconds and lamp turns to constant light mode, both the motion and light sensors are disabled. Permanently providing light until the battery capacity reduces to zero, fixture will then switch back to Sensor Mode.
